Fixed in Releases:		

Description

Install foreman 1.12.3 all in one by foreman-installer, install ok and access web interface ok. The smart-proxy is added automatically, but the provisioning setup pre-requisites is not satisfied. the error show me is as showing in attached piture. There is no more information for to resole it and not found any steps to fix it in docs. Could any one give me some suggestion?

The distro I use is CentOS 7, and the repos I used is as following:

1. yum install vim wget unzip deltarpm epel-release -y
2. rpm -Uvh <https://yum.puppetlabs.com/puppetlabs-release-pc1-el-7.noarch.rpm>
3. yum localinstall https://yum.theforeman.org/releases/1.12/el7/x86_64/foreman-release.rpm
4. yum install foreman-release-scl

History

#1 - 10/09/2016 04:20 AM - Ohad Levy

try running puppet agent -t on your foreman server?

if its puppet 4, you might need to prefix it with /opt/puppetlabs/bin/...

#2 - 10/09/2016 04:30 AM - vanlos wang

It is iptables issue, expose the ports turns to OK.

#3 - 10/09/2016 06:44 AM - Ohad Levy

- Status changed from New to Resolved
