[illegible]

```
Available: puppet-agent-1.9.1-1.el7.x86_64 (puppetlabs-pcl)
puppet >= 4.0.0-1.el7
Available: puppet-agent-1.9.2-1.el7.x86_64 (puppetlabs-pcl)
puppet >= 4.0.0-1.el7
You could try using --skip-broken to work around the problem
You could try running: rpm -Va --nofiles --nodigest
```

This issue also seems to prevent me from being able to start the httpd daemon

It looks like you're installing puppet 4 while puppet 3 is still installed. See http://projects.theforeman.org/projects/foreman/wiki/Upgrading_from_Puppet_3_to_4 on how to do this.
