Pull request:	https://github.com/theforeman/puppet-dns/pull/95		

Description

For DHCP we can create more subnets with:

```
/etc/foreman-installer/custom-hiera.yaml:

dhcp::pools:
 isolated.lan:
   network: 192.168.99.0
   mask: 255.255.255.0
   gateway: 192.168.99.1
   range: 192.168.99.5 192.168.99.49
```

For DNS this is not yet possible.

Associated revisions

Revision 88d31627 - 08/11/2017 05:22 PM - Ewoud Kohl van Wijngaarden

Fixes #20555: Add a zones parameter

This allows creating additional zones through a parameter. This can be
useful when using hiera.
