<b>Pull request:</b> <a href="https://github.com/theforeman/puppet-for-eman_proxy/pull/364">https://github.com/theforeman/puppet-for-eman_proxy/pull/364</a>	
<b>Description</b>	
<p>The installer for katello broke for me on centos 7 7.4.1708 it seems certain packages like shim and some grub2-efi packages are no longer available or have been renamed.</p> <p>Adding the old repo (7.3.1611) seemed to fix the problem. I think during the move from one to the other the vault archives weren't completed.</p> <p>Platform: qemu virtual running centos 7 64</p> <p>SW Versions: foreman-1.15.3-1.el7.noarch katello-3.4.5-1.el7.noarch</p>	

#### History

#1 - 09/14/2017 05:04 AM - Ivan Necas

- Project changed from Foreman to Installer
- Category set to Foreman modules
- Status changed from New to Closed
- translation missing: en.field\_release set to 240
- Pull request [https://github.com/theforeman/puppet-foreman\\_proxy/pull/364](https://github.com/theforeman/puppet-foreman_proxy/pull/364) added
