

Installer - Bug #21402

Running migrations on disabled scenario produces errors in %post script

10/19/2017 08:28 PM - Martin Bacovsky

Status: New	
Priority: Normal	
Assignee:	
Category: foreman-installer script	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1499861	Red Hat JIRA:
Pull request:	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1499861	
Description of problem: Upgrading from snap 18 to satellite-6.3.0-20.0.beta.el7sat.noarch: %post(foreman-installer-1:1.15.5-1.el7sat.noarch) scriptlet failed, exit status 27	
Version-Release number of selected component (if applicable): satellite-6.3.0-20.0.beta.el7sat.noarch foreman-installer-1.15.5-1.el7sat.noarch	
How reproducible: 1 of 1	
Steps to Reproduce: 1. Install 6.3.0 snap 18 and configure repos to latest nightly 2. # yum upgrade	
Actual results: [...] Updating : 1:foreman-installer-1.15.5-1.el7sat.noarch 31/64 warning: %post(foreman-installer-1:1.15.5-1.el7sat.noarch) scriptlet failed, exit status 27 Non-fatal POSTIN scriptlet failure in rpm package 1:foreman-installer-1.15.5-1.el7sat.noarch Updating : katello-client-bootstrap-1.4.2-1.el7sat.noarch [...]	
Expected results: There should not be any failure in scriptlets	
Additional info: Maybe the problem is only in that "foreman" vs. "satellite"? 1. rpm -q --scripts foreman-installer postinstall scriptlet (using /bin/sh): foreman-installer --scenario foreman --migrations-only > /dev/null 2. foreman-installer --scenario foreman --migrations-only ERROR: Selected scenario is DISABLED, can not continue. Use --list-scenarios to list available options. You can also --enable-scenario SCENARIO to make the selected scenario available. 3. foreman-installer --scenario satellite --migrations-only 4. echo \$? 0	

History

#1 - 10/19/2017 08:33 PM - Martin Bacovsky

- Project changed from Foreman to Installer

- Subject changed from upgrading from snap 18 to satellite-6.3.0-20.0.beta.el7sat.noarch: %post(foreman-installer-1:1.15.5-1.el7sat.noarch) scriptlet failed, exit status 27 to Running migrations on disabled scenario produces errors in %post script
- Category set to foreman-installer script
- Target version set to 227
