Description		
Hello All,		
When I am running the command		
foreman-installer --scenario foreman-proxy-content --foreman-proxy-content-parent-fqdn "FQDN"		
--foreman-proxy-register-in-foreman "true" --FQDN" --foreman-proxy-oauth-consumer-key ""		
--foreman-proxy-oauth-consumer-secret " --foreman-proxy-content-pulp-oauth-secret ""		
--foreman-proxy-content-certs-tar "/root/.com-certs.tar" --puppet-server-foreman-url "https://parent		
foreman"		
I get this error:		
<pre>/usr/share/gems/gems/kafo-2.0.0/lib/kafo/data_type.rb:29:in `register_type': Data type Foreman_proxy::ListenOn is already registered, cannot be re-registered (ArgumentError) from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/data_type_parser.rb:22:in `block in register' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/data_type_parser.rb:20:in `each' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/data_type_parser.rb:20:in `register' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/configuration.rb:343:in `block (2 levels) in register_data_types' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/configuration.rb:342:in `each' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/configuration.rb:342:in `block in register_data_types' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/configuration.rb:341:in `each' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/configuration.rb:341:in `register_data_types' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/configuration.rb:96:in `modules' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/configuration.rb:207:in `params' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/configuration.rb:217:in `preset_defaults_from_puppet' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/scenario_manager.rb:208:in `load_and_setup_configuration' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/scenario_manager.rb:108:in `show_scenario_diff' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/scenario_manager.rb:115:in `check_scenario_change' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/kafo_configure.rb:78:in `initialize' from /usr/share/gems/gems/clamp-1.0.0/lib/clamp/command.rb:133:in `new' from /usr/share/gems/gems/clamp-1.0.0/lib/clamp/command.rb:133:in `run' from /usr/share/gems/gems/kafo-2.0.0/lib/kafo/kafo_configure.rb:163:in `run' from /usr/sbin/foreman-installer:8:in `<main>'</main></pre>		
Could someone help please.		

History

#1 - 04/19/2018 07:28 PM - Anonymous

- Project changed from Foreman to Installer
- Category deleted (Proxy gateway)

I would also suggest asking the question in "theforeman" irc channel and/or <https://community.theforeman.org/>.

Thanks I wasn't so sure since it is something to do with proxy and foreman at the same time.

- *Status changed from New to Feedback*

I would suspect you are mixing a Foreman version with a mismatched Katello version. Could you share the versions you're using?
