### #3 - 10/30/2018 11:34 AM - Marcus Hann

I ran into this too, with a fresh install of the 18.04.1 LTS release of Ubuntu installed via the minimal installer.

For me it was caused by not having the universe repository enabled. To fix this you can just run 'sudo add-apt-repository universe' and then do an apt update.

Maybe this is something that could be mentioned in the ubuntu install documentation?
