Description

See http://groups.google.com/group/foreman-dev/browse_thread/thread/4413e39e2e9a030d

- update passenger module to install passenger-standalone
- replicate foreman::config::passenger for standalone usage
    - this will need to configure a sensible number of workers, check katello-configure as it does something similar
- configure the foreman module to use the standalone class on SCL systems

History

#1 - 06/04/2013 07:56 AM - Ohad Levy

- Status changed from New to Rejected

- Priority changed from High to Normal

- Target version deleted (1.2.0)

it seems that using passenger 4 solves this usage case, rejecting.
