

Kafo - Bug #25657

Data type is already registerd, cannot be re-registered

12/10/2018 02:29 PM - Ewoud Kohl van Wijngaarden

Status: Ready For Testing	
Priority: Normal	
Assignee: Ewoud Kohl van Wijngaarden

Target version:	
Difficulty:	Fixed in Releases:
Triaged: No	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/kafo/pull/230	
Description	
Sometimes the error message <code>ArgumentError: Data type Puppetdb::Ttl is already registered, cannot be re-registered</code> (for some data type) shows up.	
It turns out that all data types are in a global registry. When <code>Kafo::Configure</code> is loaded initialized, it reads the data types. This is done when the scenario has changed. That's correct, but it should clear the global registry to avoid stale entries and potential duplicates.
