### Description

On latest nightly, when running foreman-installer --upgrade I get:

```
Upgrade Step: drop_apache_foreman_group...
Removing user apache from group foreman
gpasswd: user 'apache' is not a member of 'foreman'
gpasswd -d apache foreman failed! Check the output for error!
Upgrade step drop_apache_foreman_group failed. Check logs for more information.
```

This step was added in [https://github.com/Katello/katello-installer/commit/7e2b81d6e12ecf9e0c4b1ebda0895001a2a9d211](https://github.com/Katello/katello-installer/commit/7e2b81d6e12ecf9e0c4b1ebda0895001a2a9d211) and seems not to work when the Apache user isn't member of the Foreman group to begin with.

### Associated revisions

#### Revision 9b58a70d - 12/27/2018 04:14 PM - Ewoud Kohl van Wijngaarden

Fixes #25740 - Ensure a user is a member when removing

When a user is not part of a group, the removal fails. Because this is
the desired end state, the upgrade should not fail on that.

#### Revision 716c9ccd - 12/27/2018 05:49 PM - Ewoud Kohl van Wijngaarden

Fixes #25740 - Use strings for user and group
