Triaged: No	
Fixed in Releases:	
Description We are using foreman with puppet and in the dashboard its unable to fetch the current environment running in the hosts. And If i see the foreman proxies I see the error message I'm attaching the screenshot . Please let me know where should I spot on the configuration to fix the issue.Thanks in advance.

- Status changed from New to Rejected

This is likely an issue with the smart proxy configuration or with communication between the foreman server and smart proxy. Keep in mind that 1.15 is long out of support.

Please open a thread on <https://community.theforeman.org/c/support> if you need further support.
