| Bugzilla link: | 1732921 | Red Hat JIRA: |
| Pull request: | https://github.com/theforeman/foreman-installer/pull/375 | |
| Description | | |
| <p>Since we've moved to using the UpgradeTask model¹ of Foreman via seeds² we need to be absolutely certain that db:seed runs during installation and upgrades so that all of the upgrade tasks are executed. We can't rely on the potential side-effect of other actions during installation or upgrade to do the seed for us.</p> <p>[1] https://github.com/theforeman/foreman/pull/5780/files [2] https://github.com/Katello/katello/blob/master/db/seeds.d/111-upgrade_tasks.rb</p> | | |
