Installer - Bug #28370

"Invalid tuning profile" when no --tuning is passed to the installer

11/27/2019 08:09 AM - Evgeni Golov

Status:	Rejected		
Priority:	Urgent		
Assignee:	Evgeni Golov		
Category:	foreman-installer script		
Target version:	1.24.0		
Difficulty:		**Fixed in Releases:**	
Triaged:	No	**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

When you run foreman-installer --scenario katello, you end up with

```
Invalid tuning profile
'' is not one of default, medium, large, extra-large, extra-extra-large
```

as there is nothing that loads "default" as the default profile, when no --tuning was passed.

History

#1 - 11/27/2019 08:34 AM - Evgeni Golov

The **real** problem is that get_custom_fact will return nil when the fact isn't set yet:

```
[root@box ~]# foreman-installer --scenario katello --help |grep tuning
    --tuning INSTALLATION_SIZE    Tune for an installation size. Choices: default, medium, large, extra-large,
 extra-extra-large (default: nil)
```

#2 - 11/27/2019 08:39 AM - The Foreman Bot

- Status changed from New to Ready For Testing

- Pull request https://github.com/theforeman/foreman-installer/pull/416 added

#3 - 11/27/2019 08:45 AM - Evgeni Golov

- Status changed from Ready For Testing to Rejected
