<b>Description</b>	
<p>This means updating the modules' metadata to the new locations and doing releases.</p> <p>It is also possible to mark modules as deprecated in the forge (including replacement option) using <a href="https://forgeapi.puppetlabs.com/#operation/deprecateModule">https://forgeapi.puppetlabs.com/#operation/deprecateModule</a> which should steer users in the right direction.</p> <p>The benefit is that we only have a single account to maintain for all modules.</p>
