#### Description

since <https://rubygems.org/gems/beaker/versions/4.22.0> was released today, we are seeing failures of installer puppet module acceptance tests due to

```

Beaker::Host::CommandFailure:

```
Host 'centos7-64.example.com' exited with 1 running:
```

```
chmod 0600 ~/.ssh
```

Last 10 lines of output were:

```
chmod: cannot access '/root/.ssh': No such file or directory
```

```

We can work around this for now with `gem 'beaker', '< 4.22.0`
