Pull request:	https://github.com/foreman/foreman-installer/pull/506	
Description		
When the installer is ran but failed, the success file is written. On the next run, the success file exists so the initial credentials are not shown.		
This was found on 2.1.0-RC1 but can be traced to 540638cd3bc295a0f857f87b89863af5db8558b9 (#29243) which was picked to 2.0-stable.

Fixes #29894 - Only write the success file on success

540638cd3bc295a0f857f87b89863af5db8558b9 introduced a success file, but it's written regardless of success. When the first run fails, the user doesn't see initial credentials on the second (successful) run.
