Pull request:	https://github.com/foreman/foreman-installer/pull/510	
Description		
<p>Currently foreman-maintain is called to stop and start services in the EL7 upgrade. However, foreman-maintain is unavailable on Debian. It's also possibly a circular problem because foreman-maintain depends on the installer for certain actions so it is possible to end up in an infinite loop.</p> <p>The installer should be able to stop and start services by calling systemctl.</p>

Fixes #29963 - Manage services without foreman-maintain

Currently foreman-maintain is called to stop and start services in the EL7 upgrade. However, foreman-maintain is unavailable on Debian. It's also possibly a circular problem because foreman-maintain depends on the installer for certain actions so it is possible to end up in an infinite loop.
