Triaged:	Yes	**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/puppet-foreman_proxy/pull/602		

Description

Not all installations require TFTP to be present. To get a more minimal baseline, the default should be off.

Upgrades via the installer should not be affected. Direct users of the module will be affected.

Fixes #30198 - Disable TFTP by default

Not all installations require TFTP. This is only needed when doing
kickstart/preseed/... installations. Typically that's bare metal but can
be used on virtual machines as well. Doing those kind of installations
also requires DHCP so disabling it is not a huge extra step.
