Description	
<p>This often causes the database to be initialized as ASCII which then fails. https://community.theforeman.org/t/foreman-2-2-rc3-with-katello-3-16-on-centos-7-recommended-for-prod/20771/6 is just the latest example.</p> <p>We should enforce it just like we do for Foreman's database.</p>

Fixes #31018 - Force UTF-8 database encoding

If this is not set, the environment is used. Often this causes the database to be initialized as ASCII which breaks Pulpcore.
