Status:	Ready For Testing	
Priority:	Normal	
Assignee:	Ewoud Kohl van Wijngaarden	
Category:	foreman-installer script	
Target version:		
Difficulty:		Fixed in Releases:
Triaged:	No	Found in Releases: 2.1.3
Bugzilla link:	2119303	Red Hat JIRA:
Pull request:	https://github.com/foreman/foreman-installer/pull/584 , https://github.com/foreman/foreman-installer/pull/585	

Description

<https://community.theforeman.org/t/puppet-with-splay-true/20777>

When there's splay=true in /etc/puppetlabs/puppet/puppet.conf, puppet apply waits a random period (up to 30 minutes). Kafo deals with this by using --config=/tmp/.../puppet.conf which is generated in the ExecutionEnvironment. The boot hook apply_puppet_code does not use this which causes the host's puppet.conf to take effect. This can lead to much longer installer times where it just sleeps.
