

Foreman - Tracker #31142

New report model and import/view mechanism

10/23/2020 02:47 PM - Lukas Zapletal

Status: New	% Done: 0%
Priority: Normal	
Assignee: Lukas Zapletal	
Category: Reporting	
Target version:	
Difficulty: hard	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1965246	Red Hat JIRA:
Description Reports are slow, refactor how we store them from scratch. New plugin and proxy plugin will be created, we can later on consider merging them into core. The full plan is in the README: https://github.com/theforeman/foreman_host_reports Discussion on how we did get there: https://community.theforeman.org/t/rfc-optimized-reports-storage/15573
