Installer - Bug #3143

Installer for 1.3 overwrites custom repo

09/24/2013 12:09 PM - Lukas Zapletal

Status:	Rejected		
Priority:	High		
Assignee:	Lukas Zapletal		
Category:	foreman-installer script		
Target version:	1.3.0		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**

Pull request:			

Description

By default we now deploy custom_repo: true for both foreman and proxy in Foreman 1.3 RC2.

For some reason, this gets overwritten, so RC fails.

History

#1 - 09/24/2013 12:09 PM - Lukas Zapletal

- Related to Tracker #3112: [TRACKER] Issues to be released in 1.3 RC or final added

#2 - 09/24/2013 01:44 PM - Greg Sutcliffe

I couldn't reproduce this on any Debian OS yesterday - a clean install, add the foreman 1.3 repo, and execute "foreman-installer -v" seems to work fine. I'll retest to be sure, once I have repaired my OpenStack box...

#3 - 09/25/2013 10:00 AM - Greg Sutcliffe

I can't replicate this on wheezy at all:

```
root@installer1:~# cat /usr/share/foreman-installer/config/answers.yaml |grep custom_repo
    custom_repo: true
    custom_repo: true
root@installer1:~# ls /etc/apt/sources.list.d/
puppetlabs.list
```

Maybe something odd in the RPM packages?

#4 - 09/25/2013 02:59 PM - Lukas Zapletal

- Status changed from New to Assigned

- Assignee set to Lukas Zapletal

Sorry guys, I need to check this one on my own. For some reason it was happenning to me, not sure if I was doing something wrong. Lemme check that by EOW.

#5 - 09/27/2013 07:31 AM - Lukas Zapletal

- Related to deleted (Tracker #3112: [TRACKER] Issues to be released in 1.3 RC or final)

#6 - 09/27/2013 07:31 AM - Lukas Zapletal

- Status changed from Assigned to Rejected

Not able to reproduce with yum.tf.org repos.
