Pull request:	
Description after running foreman-installer --scenario=katello_devel and then later running just 'foreman-installer', i get an error: 1. foreman-installer ERROR: No installation scenario was selected, the installer cannot continue. Even --help content is dependent on selected scenario. Select scenario with --scenario SCENARIO or list available scenarios with --list-scenarios. This used to remember the selected scenario This was seen on: foreman-installer-2.4.0-0.1.develop.20201130031225gitc214354.el7.noarch & foreman-installer-2.3.0-0.2.develop.20201023193501git073aea3.el7.noarch	

History

#1 - 12/02/2020 02:50 PM - Justin Sherrill

- Subject changed from installer does not save sceanrio between runs to installer does not save scenario between runs

#2 - 12/02/2020 03:21 PM - Justin Sherrill

- Subject changed from installer does not save scenario between runs to installer does not save scenario between runs with katello_devel

- Description updated

#3 - 12/02/2020 03:22 PM - Justin Sherrill

This may only happen with the katello_devel scenario
