Pull request:	https://github.com/theforeman/foreman-installer/pull/639, https://github.com/theforeman/foreman-installer/pull/634			

Description

From https://community.theforeman.org/t/updating-foreman-2-2-1-to-2-3-1-and-katello-3-17-1-to-3-18-issue/21738

It looks like I used the incorrect legacy directory in #30423. In our layout we used docroot as media directory, not artifact.

Fixes #31548 - Use the correct pulpcore legacy dir

In our previous layout we used /var/lib/pulp/docroot as media directory
while upstream used /var/lib/pulp as media directory and had all files
in /var/lib/pulp/artifact. This artifact directory also exists in our
previous layout, but that's /var/lib/pulp/docroot/artifact.

Pulp can't move /var/lib/pulp to /var/lib/pulp/media so their migration
was harder. We can just rename /var/lib/pulp/docroot to
/var/lib/pulp/media and place a symlink in the old location.
