

Installer - Bug #31662

Foreman content proxy doesn't listen on port 80 anymore

01/18/2021 06:21 AM - Gerald Vogt

Status:	Closed	
Priority:	Normal	
Assignee:	Eric Helms	
Category:	Foreman modules	
Target version:	2.3.3	
Difficulty:		Fixed in Releases: 2.4.0
Triaged:	No	Found in Releases: 2.3.1
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/puppet-foreman_proxy_content/pull/315	
Description		
<p>Upgrading from katello 3.17 to katello 3.18.1, foreman 2.2 to 2.3.1 it seems my content proxy server doesn't listen to port 80 anymore. I have a separate server running only the content proxy for my clients. After upgrade it's not listening to port 80, which breaks (among other things) provisioning through those proxys as the server hosting the tftp server tries to retrieve the vmlinuz etc. via port 80 from the proxy.</p> <p>See also https://community.theforeman.org/t/content-proxy-not-listing-to-port-80-anymore/21996</p>
