Revision 1de17d5f - 03/23/2021 05:10 PM - Eric Helms

Fixes #32180: Unset system proxy and SSL environment variables for the duration of the install

Moves from checking for http proxy and SSL environment variables and
failing if they are present to a model of unsetting them during
the duration of the install run. This does not change them on
the system itself.
