Katello - Refactor #32385

Use Foreman client certificate settings directly for Candlepin events communication to Artemis

04/22/2021 12:50 AM - Eric Helms

Status:	New		
Priority:	Normal		
Assignee:

Target version:	Katello Backlog		
Branch:		**Pull request:**	
Difficulty:		**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	

Description

The installer is making a change to use the Foreman client certificates for communication to Artemis. Katello's internal code should update to use the Foreman client certificate settings directly and drop the use of:

```
:candlepin_events:
  :ssl_cert_file: /etc/foreman/client_cert.pem
  :ssl_key_file: /etc/foreman/client_key.pem
  :ssl_ca_file: /etc/pki/katello/certs/katello-default-ca.crt
```
