Revision 919eaa47 - 07/15/2021 04:32 PM - William Clark

Fixes #32511 - Add a puppet type and provider to manage an NSS database.

This commit adds and uses the new provider to manage the NSS db for the installation. The password file location is changed from within the NSS db directory to its parent, and the old password file will be cleaned up when it first runs. The password itself is now generated and cached using extlib.
