

Installer - Bug #32529

The installer does not update the katello-ca-consumer-latest symlink to the latest RPM once the bootstrap RPM's release is greater than 9.

Fixes #32529: Find latest bootstrap RPM by sorting as integer

The code that finds the maximum (latest) bootstrap RPM was doing so via a lexical sort which resulted in incorrect ordering for what should be latest and thus the 9th RPM was always latest. For example, once the 10th RPM was generated the order went: 1,10,2,3 etc.

This change moves to parsing out the digits (in case there are alphabet characters present from the dist) in the release, converting to integers and then sorting.
