<b>Pull request:</b> <a href="https://github.com/theforeman/puppet-pulp/pull/413">https://github.com/theforeman/puppet-pulp/pull/413</a>	
<b>Description</b> Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1950475">https://bugzilla.redhat.com/show_bug.cgi?id=1950475</a>  By default SSLInsecureRenegotiation is enabled here: ~~~ [root@iridium ~]# vi /etc/httpd/conf.d/10-pulp.conf  1. allow older yum clients to connect, see bz 647828 SSLInsecureRenegotiation on ~~~  It looks like in bz 1174942 we already wanted to have this disabled, but it's still enabled by default even in Satellite 6.8.  If we still have reason to enable this by default then perhaps an installer option to disable it, or changing the value via custom-hiera if it can be edited there.
