Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman-installer/pull/706 , https://github.com/foreman/foreman-installer/pull/708	
Description	
Since #29097 foreman-installer has automatically reinstalled puppet-agent-oauth on RPMs. This is needed when the Ruby version of Puppet's AIO package has changed. While that typically only happens on a major version upgrade, it's great for users to have it automated. Especially with Foreman 3.0 adding support for Puppet 7.	
https://github.com/foreman/foreman-installer/pull/641 started this effort already.

Revision 567172b6 - 08/02/2021 03:28 PM - Ewoud Kohl van Wijngaarden

Fixes #33191 - Debian puppet-agent-oauth reinstall support

This has been supported for a while on RPM-based distros. This adds it on Debian.

It also changes it to log an error on noop that it detected an incorrect situation.

Credits to @timdeluxe for the specific dpkg/apt commands. This PR takes a bit different implementation approach by also looking at facts. This should save some useless command executions on both platforms.

Revision 82a4e9ec - 08/03/2021 10:41 AM - Ewoud Kohl van Wijngaarden

Refs #33191 - Use symbols for facts

In 567172b6411ed9d0731614fd29455e8b7877ccd0 facts were incorrectly using strings while it should use symbols.

It also adds a debug line to make it easier to follow what happened.

Fixes: 567172b6411ed9d0731614fd29455e8b7877ccd0
