Target version:	3.0.0		
Difficulty:		**Fixed in Releases:**	3.0.0
Triaged:	No	**Found in Releases:**	
Bugzilla link:	1963956	**Red Hat JIRA:**	
Pull request:	https://github.com/theforeman/foreman-packaging/pull/6964, https://github.com/theforeman/foreman-packaging/pull/7127		

Description

Description of problem:
foreman-maintain tool can easily generate a lot of logs (i.e. when used as a services check tool every few minutes). Default Satellite deployment should housekeep those logs automatically, similarly like e.g. /var/log/foreman or /var/log/foreman-proxy .

Please provide in part of foreman-maintain package a file like (copy from foreman logs):

1. cat /etc/logrotate.d/foreman-maintain
2. Foreman-maintain logs:
   /var/log/foreman-maintain/*.log {
   daily
   missingok
   rotate 14
   compress
   delaycompress
   notifempty
   copytruncate
   } #

Version-Release number of selected component (if applicable):
Sat6.9

How reproducible:
100%

Steps to Reproduce:
1. Repeatedly run "foreman-maintain service status" or any other f-m command
2. Check that the /var/log/foreman-maintain/foreman-maintain.log* logs are never logrotated / housekept.

Actual results:
2. No logrotation.

Expected results:
2. Some reasonable logrotation (not necessarily the one I suggested).
