<b>Description</b>	
Right now, we don't special-case our assets folders in Apache, which results in these requests hitting Rails instead of being served directly by Apache (which should be 1000000x faster).	
Ewoud said this is because it was tried to be implemented when we switched from Passenger to Puma, but Katello assets were broken afterwards, details in <a href="https://projects.theforeman.org/issues/35409">https://projects.theforeman.org/issues/35409</a>
