<b>Description</b>	
<p>The foreman installer command accepts a command that is invalid:</p> <pre>---no-enable-foreman-puppet</pre> <p>When this command is added the foreman installer still tries to install the foreman-proxy and gets the following errors:</p> <pre>2022-01-28 16:33:41 [NOTICE] [root] Loading installer configuration. This will take some time. 2022-01-28 16:33:45 [NOTICE] [root] Running installer with log based terminal output at level NOTICE. 2022-01-28 16:33:45 [NOTICE] [root] Use -l to set the terminal output log level to ERROR, WARN, NOTICE, INFO, or DEBUG. See --full-help for definitions. 2022-01-28 16:33:47 [NOTICE] [configure] Starting system configuration. 2022-01-28 16:33:52 [ERROR ] [configure] Evaluation Error: Error while evaluating a Resource Statement, Foreman::Plugin[puppet]: 2022-01-28 16:33:52 [ERROR ] [configure] parameter 'version' expects a String value, got Undefined 2022-01-28 16:33:52 [ERROR ] [configure] parameter 'config_file_group' expects a String value, got Undefined (file: /usr/share/foreman-installer/modules/foreman/manifests/plugin/puppet.pp, line: 6) on node proxy.example.com 2022-01-28 16:33:52 [NOTICE] [configure] System configuration has finished.</pre> <p>There were errors detected during install. Please address the errors and re-run the installer to ensure the system is properly configured. Failing to do so is likely to result in broken functionality.</p> <pre>The full log is at /var/log/foreman-installer/foreman.log</pre> <p>the command that needs to run is:</p> <pre>--no-enable-foreman-plugin-puppet</pre> <p>Trying to figure out why the foreman installer command would accept an invalid command and try to install?</p> <p>Note: Have submitted <a href="https://github.com/theforeman/theforeman.org/pull/1946">https://github.com/theforeman/theforeman.org/pull/1946</a> to have the documentation updated with the correct command.</p>
