Description

Once these two changes are merged:

- drop VM overcommit
- introduce development profile to tuning

There will be nothing that needs the disable system checks option anymore and it can be removed entirely.

Refs #35149 - Remove katello hook dirs

In 10a30ba937f8e4c4cbbad889a05e3f5a8965eaf5 the top level directory
katello was removed. This means the hook_dirs entry is no longer needed.
It also means the directory no longer needs to be copied during
installation.
