

Installer - Bug #35335

/etc/pki/katello/certs/katello-server-ca.crt deployed with too strict permissions

Pull request: https://github.com/theforeman/puppet-certs/pull/403	
Description	
right now, the file is deployed as:	
<pre># ls -ld /etc/pki/katello/certs/katello-server-ca.crt -r--r-----. 1 root foreman 2533 Aug 4 13:59 /etc/pki/katello/certs/katello-server-ca.crt</pre>	
which means it can't be read by users outside the foreman group (and root).	
but there is actually nothing private in that file, so we can loosen the restriction a bit

Revision 179aa636 - 08/05/2022 03:45 PM - Evgeni Golov

Fixes #35335 - allow everyone to read the Katello CA certificate

There is nothing secret in that file, and this allows non-root users to use hammer and friends to check the HTTPS cert of the server.
