Description		
<p>In #34590 the default modules were no longer loaded, but this also disabled mod_expires. This makes #33956 less effective. It is still an improvement over serving assets via Rails, but it doesn't allow the browser to aggressively cache assets.</p> <p>It should be noted that mod_expires in puppetlabs-apache is a bit special. I ran into this in https://github.com/puppetlabs/puppetlabs-apache/pull/2288, so the fix may be needed in multiple places.</p>

Fixes #35870 - Ensure mod_expires is loaded

In case only minimal Apache modules are loaded then mod_expires may not be present. The result is that assets are sent without headers that allow browsers to cache it.
