Note that we usually deprecate things before removing. For example, I don't know if any plugin uses this component.

I couldnt find any plugin in theforeman org that uses it, it was created for the breadcrumb switcher and its last use was removed in 2019. I can add a deprecation if it is still needed

#3 - 01/17/2023 12:29 PM - Ewoud Kohl van Wijngaarden

The reason we deprecate things that plugins could is it because there can be private plugins that we don't know about. I think it's a good habit to get into.
