Description

Today we have --puppet-foreman-proxy-content-puppet true, and then the user needs to supply certificate paths to our theforeman/puppet module. Instead we should move this integration into our theforeman/puppet module.

I'm proposing a boolean parameter which can be set via Hiera. Then in our installer's Hiera configuration we can set this for the appropriate scenarios.

Associated revisions

Revision 49fb1afb - 01/27/2023 10:50 AM - Ewoud Kohl van Wijngaarden

Refs #35985 - Implement optional Katello integration

Katello uses a different certificate structure. This moves over the integration bits from puppet-foreman_proxy_content to this module. It also means fewer variables need to be set in the installer itself.

Revision 12bbe7a9 - 02/20/2023 08:42 PM - Ewoud Kohl van Wijngaarden

Refs #35985 - Rely on theforeman/puppet to do integration

The integration is moved into theforeman/puppet so this is no longer needed.

Revision dad33203 - 02/20/2023 08:42 PM - Ewoud Kohl van Wijngaarden

Fixes #35985 - Use Katello integration in theforeman/puppet
