Refs #36090 - Support plugins are absent

This makes it possible to remove plugins, even though we don't deal with
the database.

Revision ccf4e324 - 11/07/2023 12:42 PM - Ewoud Kohl van Wijngaarden

Fixes #36090 - Support REX cockpit removal

This doesn't deal with the database, but cockpit is a special plugin in
that it's a subpackage of the regular Remote Execution plugin.

By default it uses undef so you can still set the version globally as
well.
