

## Installer - Bug #36211

### Foreman-installer purges custom powerdns-plugin settings in /etc/foreman-proxy/settings.d/dns\_powerdns.yml

03/21/2023 07:49 AM - Sebastian @

<b>Status:</b>	Closed

<b>Pull request:</b>	<a href="https://github.com/theforeman/foreman-installer/pull/839">https://github.com/theforeman/foreman-installer/pull/839</a> , <a href="https://github.com/theforeman/foreman-installer/pull/840">https://github.com/theforeman/foreman-installer/pull/840</a>	
<b>Description</b>		
<p>The installer resets the value "powerdns_rest_url" of the manually edited file /etc/foreman-proxy/settings.d/dns_powerdns.yml to a default url each run.</p> <p>I have not found a documentation or a way to provide /etc/foreman-installer/scenarios.d/katello-answers.yaml with a custom value yet.</p> <p>This behavior was introduced a few weeks ago, sadly i can't tell the exact version anymore.</p>

Fixes #36211 - Add PowerDNS and Route53 plugins to scenarios

These plugins have long been packaged, but the Foreman Proxy module has started to include the correct provided if needed<sup>1</sup>. This means users now need to be able to configure the parameters, where they could previously manually manage it.

- Found in Releases deleted (3.5.3)

##### #2 - 03/21/2023 09:44 AM - Ewoud Kohl van Wijngaarden

- Project changed from Foreman to Installer

This is [https://github.com/theforeman/puppet-foreman\\_proxy/commit/463c87638c83387ce2cb748dbe9433f9a027241c](https://github.com/theforeman/puppet-foreman_proxy/commit/463c87638c83387ce2cb748dbe9433f9a027241c) which caused it. The problem is that the PowerDNS provider is not available in the Katello scenario, though it should be.

A temporary workaround is to provide it in /etc/foreman-installer/custom-hiera.yaml like this:

```
foreman_proxy::plugin::dns::powerdns::rest_api_key: My_KEY
foreman_proxy::plugin::dns::powerdns::rest_url: My_URL
```
