Description	
Since #34888 (688d0a7dc08fc78407ed84466f3b0861c3cbfc2f) the installer no longer fails when katello-certs-check fails. Prior to it <code>execute!</code> was used, which caused it to halt. Now it uses <code>execute_command</code> without an <code>exit()</code> statement.

Fixes #36567 - Make katello-certs-check failures fatal

Prior to [688d0a7dc08fc78407ed84466f3b0861c3cbfc2f](#) the `execute!` method was used, which caused the installer to exit if `katello-certs-check` failed. That commit changed it to only output the error on failure, but it no longer stopped the installer.

Fixes: [688d0a7dc08f](#) ("Fixes #34888: Display katello-certs-check output only if error")
