Description	
This is about replacing https://github.com/theforeman/foreman_maintain/blob/1e20bbd9f32a4f47193c4833fbd4012772b34dc4/definitions/checks/foreman_proxy/check_tftp_storage.rb with a native implementation.	
I'm suggesting to implement a POST /tftp/prune to start pruning old files. Foreman has a setting for the token duration so this should be posted as a setting. The setting can be passed as a parameter.
