| Description A regression on pulp ansible that's in the pulpcore 3.28 repo will stop users from being able to sync ansible content to smart proxies. This PR solves it: https://github.com/pulp/pulp_ansible/pull/1561 The change requires us to set the new ANSIBLE_PERMISSION_CLASSES to an empty array so that no auth is needed to consume hosted ansible content. This is going to be needed for Katelo 4.10. | |
