

Installer - Bug #36916

certs-generate instructions use outdated registration method

11/13/2023 07:47 PM - Jeremy Lenz

Pull request:	
Description	
When running foreman-proxy-certs-generate, part of the output is as follows:	
--	
If you do not have the Smart Proxy registered to the Katello instance, then please do the following:	
<pre>1. yum -y localinstall http://centos8-katello-devel-stable.example.com/pub/katello-ca-consumer-latest.noarch.rpm 2. subscription-manager register --org "Default_Organization"</pre>	
--	
This is outdated, since the katello-ca-consumer rpm and the subscription-manager registration method are both deprecated. These instructions should instead tell me to use Global Registration.	

History

#1 - 11/13/2023 07:47 PM - Jeremy Lenz

- Description updated

#2 - 11/15/2023 06:45 PM - Quinn James

- Project changed from Katello to Installer

- Category changed from Foreman Proxy Content to Foreman modules
