#### Description

Cloned from 15314339{noformat:nopanel=true}

#### Description of problem:

User story "I want to restart pulpcore-worker services" can't be easily managed via foreman-maintain. In systemd, I just write:systemctl restart pulpcore-worker@\*.servicebut this does not match anything in foreman-maintain:satellite-maintain service restart --only=pulpcore-worker@\*.serviceRunning Restart

Services=====Check if command is run as root user: [OK]-----Restart applicable

services:Stopping the following service(s): [FAIL]No services found matching your parameters..Yes, I can provide a list of individual services, like:satellite-maintain service restart --only=pulpcore-worker@1.service, pulpcore-worker@2.servicebut that 1) assumes I know what the actual number of workers is, 2) is over-descriptive and error-prone.The same applies also to dynflow workers, not only pulpcore workers.foreman-maintain should support the '\*' expansion like systemd does.\*Version-Release number of selected component (if applicable):\*Sat6.12 beta\*How reproducible:\*100%\*Steps to Reproduce:\*1.satellite-maintain service restart --only=pulpcore-worker@\*.servicesatellite-maintain service restart --only=dynflow-sidekiq@\*.service\*Actual results:\*Failure like above.\*Expected results:\*All worker services are restarted.\*Additional info:\*I tried to enhance the check at [https://github.com/theforeman/foreman\\_maintain/blob/cf77d64a998b501f685688a5b048ef5925a9c9d6/lib/foreman\\_maintain/utils/service/abstract.rb#L32](https://github.com/theforeman/foreman_maintain/blob/cf77d64a998b501f685688a5b048ef5925a9c9d6/lib/foreman_maintain/utils/service/abstract.rb#L32) but have not succeeded.{noformat}
