Pull request:			

Description

Apparently there is a display error on the proxy details page under: **Infrastructure-->Smart Proxies--> *Proxy-Name* -->Overview**

After executing the command " *foreman-installer --no-enable-foreman-proxy-plugin-ansible* " to disable Ansible on the proxy, Ansible is still displayed as an active feature on the GUI page:

Version	3.5.3	
Active features	Ansible	Dynflow

However, the changes are made in the " */etc/foreman-installer/scenarios.d/foreman-proxy-content-answers.yaml* " file:

```
foreman_proxy::plugin::ansible: false
```

The value was *true* before executing the above command.

History

#1 - 02/12/2024 01:39 PM - Markus Bucher

- Found in Releases 3.9.1 added

- Found in Releases deleted (3.5.3)

#2 - 02/12/2024 05:53 PM - Markus Bucher

Looks to me like the SmartProxy Ansible plugin cannot be disabled using `foreman-installer --no-enable-foreman-proxy-plugin-ansible`.

The --no-enable-... parameter will set foreman_proxy::plugin::ansible: false in the answers.yml. This means puppet will turn back to the default parameters, setting $enabled to true.

It can be disabled by setting the following in the answers.yml:

```
foreman_proxy::plugin::ansible:
  enabled: false
```

This might be the same for other Smart Proxy plugins.

#3 - 02/12/2024 06:02 PM - Jeremy Lenz

- Project changed from Foreman to Installer

#4 - 02/14/2024 09:44 AM - Markus Bucher

- Subject changed from Display error on the proxy details page to SmartProxy Plugin cannot be disabled
