<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b>
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
Dependencies (network layout, vm hosts, etc) would be a reasonable thing for foreman to visualize, with some automatic (vm host), some default (ups4) and some inherited (vm host plugs into switch12)	
That would help make foreman a true one-stop-shop for host management/support.
