Installer - Bug #8915

The foreman-installer script exits without useful information when trusted_node_data = true

Description

We are looking to integrate The Foreman into a pre-existing system and are having difficulties.

First, the foreman-installer script exits with return code 25 and the following error message:

```
Could not get default values, check log file at /var/log/foreman-installer/foreman-installer.log f
or more information
```

The foreman-installer.log file contains:

```
[ERROR 2015-01-12 20:11:49 main] Repeating errors encountered during run:
[ERROR 2015-01-12 20:11:49 main] Could not get default values, cannot continue
```

If we remove the 'trusted_node_data = true' line from puppet.conf, the installer continues.

Expectation: trusted_node_data should be allowed when using The Foreman installer.
